

THE EU Anti Worker, Anti Trade Union

Workers have no interests in remaining in the European Union.

There are 23 million unemployed in EU countries, it is a dangerously slow growth area and the euro and key elements of EU agreements are imploding.

There is a sustained attack on collective bargaining and workers' rights throughout the EU.

The EU is fast becoming an arm of US imperialism and keen through TTIP and TISA to give the US access to health and education and other 'markets'.
